A Message from the Waccamaw Riverkeeper

What does 2014 hold?

We will work tirelessly to **investigate pollution**, seek a solution to **eliminate pollution sources and threats to our local rivers** and take legal action only when necessary **to enforce clean water laws**. We look forward to continuing to work for you as we grow our current programs and strengthen our influence at the grassroots level and with local decision makers.

A note from the new Riverkeeper:

“I am looking forward to working with all of you to protect the Waccamaw and the Winyah Bay watershed. I am learning quickly and am excited to get out on the water more now that Spring is here. Please stop by the office or at a festival to introduce yourself as I know how much I will rely on you (the members and volunteers) to help be my eyes and ears on the river. Thank you for your support over the years and let's work together to make the organization and program even better”.
